

At Monarch House, we help families adapt and thrive in a world where they feel like they truly belong. For over 13 years, we have been providing supports and services to individuals and their families who have autism spectrum disorder (ASD) or other neurodevelopmental diagnoses.

Our services are based on best practices and individualized to each family's unique needs. We improve access to required services, coordinate treatment, and focus on results for individuals of all abilities, understanding and responding to their changing needs throughout their lives.

Our team of pediatricians, psychologists, Board-Certified Behaviour Analysts®, speech-language pathologists, occupational therapists, and mental health professionals work collaboratively to deliver supports and services. In alignment with research, we value centre-based environments for providing the most effective services, however sensitive to individual family needs we have effective outbound home/community based and virtual models as well.

Monarch House offers:

-  Developmental Screenings (at no cost)
-  Autism Diagnostic Assessments
-  Caregiver mediated interventions (Early Start Denver Model, Pivotal Response Training, Quickstart, Project Impact)
-  Behaviour Therapy
-  Speech and Language Therapy
-  Occupational Therapy for motor and Coordination needs
-  Social and Skill-building Groups
-  Counselling, Psychotherapy

Embracing the unique qualities & abilities of those with Autism and developmental delays we provide easy access to immediate, effective services.
